

grid-template-rows

grid-template-rows is a CSS property used in CSS Grid Layout to define the number and size of rows in a grid container. It specifies the size of each row in the grid and can be used to create a fixed or flexible grid layout.

Grid gap

gap is a CSS property used in CSS Grid to define the space between rows and columns in a grid. It's a shorthand property for grid-row-gap and grid-column-gap, which set the gap for rows and columns respectively.
