

Link style in CSS

- `color`: Defines the color of the text
- `text-decoration`: Defines the decoration of the text (in this case, none, to remove the underline)
- `font-weight`: Defines the weight (or thickness) of the text (in this case, bold)
- `cursor`: Defines the cursor when hovering over the link (in this case, pointer)

```
<!-- Link -->
```

```
<a href="#" class="link">Click me!</a>
```

```
/* Link */
```

```
.link {
```

```
  color: blue; /* Defines the color of the text */
```

```
  text-decoration: none; /* Defines the decoration of the text */
```

```
  font-weight: bold; /* Defines the weight (or thickness) of the text */
```

```
  cursor: pointer; /* Defines the cursor when hovering over the link */
```

```
}
```

Button style in CSS

background-color: Defines the background color

color: Defines the color of the text

border: Defines the border (in this case, none, to remove it)

padding: Defines the padding (space between the text and the border)

font-size: Defines the font size

border-radius: Defines the radius of the border corners (to make them rounded)

cursor: Defines the cursor when hovering over the button (in this case, pointer)

```
<!-- Button -->
```

```
<button class="button">Click me!</button>
```

```
.button {
```

```
background-color: blue; /* Defines the background color */
```

```
color: white; /* Defines the color of the text */
```

```
border: none; /* Defines the border */
```

```
padding: 10px 20px; /* Defines the padding (space between the text and the border) */
```

```
font-size: 16px; /* Defines the font size */
```

```
border-radius: 5px; /* Defines the radius of the border corners */
```

```
cursor: pointer; /* Defines the cursor when hovering over the button */
```

```
}
```
